PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years of experience building scalable SaaS, ERP, transport-management, and B2B e-commerce platforms. Specialises in Laravel, PHP, React, Next.js, Vue.js, REST APIs, MySQL, and MongoDB, with hands-on experience in background jobs, multi-tenant architecture, third-party integrations, and mobile-app backends. Has delivered 20+ client and internal projects, from CRM/ERP systems and HR tools to marketplaces, quotation engines, and custom WordPress and Shopify themes. Turns complex business processes into secure, maintainable, high-performance software. Maintains working awareness of AI/LLM API integration (AWS Bedrock, OpenAI, Anthropic).

TECHNICAL SKILLS

Backend	PHP 8.x, Laravel (Eloquent ORM, Queues, Horizon, Sanctum, Task Scheduling), RESTful API Design & Implementation, OOP, Design Patterns
Frontend	React.js, Next.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap, jQuery, Blade, Vite
CMS & E-commerce	WordPress (custom themes and plugins), Shopify (Liquid themes, API), Wix
Databases	MySQL (schema design, indexing, query optimisation), MongoDB, Oracle Database; familiarity with PostgreSQL
DevOps & CI/CD	Git/GitHub, CI/CD, Docker, Linux/Ubuntu, Nginx, Apache, Redis; familiarity with Kubernetes
Cloud & AI	AWS (ECS, ECR, S3, SQS); awareness of AWS Bedrock and LLM APIs (OpenAI, Anthropic)
Testing & QA	Unit, integration, and end-to-end testing; familiarity with PHPUnit, Pest, and Jest
Security	Secure coding, data encryption, brute-force mitigation, session security; Sentry and New Relic monitoring
Integrations	Payment gateways (Stripe, custom), third-party REST APIs, CRM systems (HighLevel), Google Business Profile API, Google OAuth
Tools & Methods	PhpStorm, Postman, Jira, Figma (handoff), Agile/Scrum

WORK EXPERIENCE

Senior Full-Stack Engineer — *Jun 2023 – Present*
Brandix Soft — Lahore, Pakistan

- Delivered 16 projects end to end (web platforms, internal CRM/ERP and HR tools, mobile-app APIs, and custom CMS themes).
- **Architecture:** Architected transport-management dashboards, centralised ERP modules, and multi-tenant SaaS platforms using Laravel and React/Next.js.
- **APIs & Integrations:** Built secure REST APIs, payment-gateway integrations, and real-time data-synchronisation features, including multi-vendor product, stock, and order sync and REST APIs for iOS and Android apps.
- **Infrastructure:** Managed server provisioning, background queues, scheduled jobs, and worker processes supporting operational workflows; deployed on Docker and Nginx/Apache.
- **Database Performance:** Improved performance through query optimisation, indexing, caching, and data-model improvements across MySQL and MongoDB.
- **Security:** Implemented application logging, encryption practices, and threat monitoring to strengthen platform security.
- **Delivery:** Worked in Agile cycles with product, design, and SEO teams; managed CI/CD pipelines and background worker optimisation.

Full-Stack Developer — *Sep 2022 – May 2023*
SAR ZONE (SMC-PVT) Ltd. — Faisalabad, Pakistan

- Developed scalable features using Laravel, PHP, and Vue.js single-page application modules; shipped 3 enterprise platforms (transport, real-estate ERP, B2B marketplace).
- Designed relational database schemas, migrations, and query structures focused on data integrity and maintainability.
- Built and documented internal REST APIs for integrations and automated data workflows.
- Refactored legacy code, debugged production issues, and performed performance profiling to improve stability.

PHP Web Developer — *Dec 2021 – Aug 2022*
AdRightly — Faisalabad, Pakistan

- Built and customised PHP MVC modules using OOP principles and secure coding standards; contributed to 3 customer-facing platforms.
- Worked with project managers and designers to turn wireframes into functional, secure, documented web features.
- Debugged runtime issues, refactored code, and optimised features to improve platform stability.

Frontend Developer *Sep 2021 – Nov 2021*
AdRightly Faisalabad, Pakistan

- Built responsive, mobile-friendly interfaces using semantic HTML5, CSS3/Tailwind, JavaScript, and jQuery.
- Integrated data endpoints with UI modules alongside backend engineers; optimised assets and scripts for fast rendering.

Internship Trainee *May 2021 – Aug 2021*
Masood Textile Mills Limited Faisalabad, Pakistan

- Developed introductory backend layouts with the .NET framework; assisted with SQL queries, schema analysis, and Oracle Database concepts; took part in daily standups and code reviews.

KEY PROJECTS

Talk To Trader — US Business Directory Platform *Brandix Soft, Apr 2026 – Present*
Stack: Laravel, MySQL, Vite, Blade

- Architected and deployed a US service-directory platform as sole developer, owning the build from database design to production deployment.
- Designed scalable data structures for business listings and vendor profiles; built real-time buyer–vendor chat for direct negotiation and responsive Vite-powered Blade interfaces for listing and search.
- Delivered a SuperAdmin panel for content, vendor, and listing administration.

Google Business Profile Analytics & White-Label PDF Reporting Dashboard — *Brandix Soft, Mar 2026 – Apr 2026*
Stack: Laravel, React.js, Google Business Profile API, Google OAuth

- Built a full-stack platform for agencies and local businesses to monitor and present local SEO performance, with Google OAuth connection and multi-account, multi-location management.
- Location dashboards track 8 metrics: Search and Maps profile views, phone calls, direction requests, website clicks, bookings, and top search keywords.
- Added competitor benchmarking against the top 10 local listings (ratings, review counts, verification status).
- Built an 11-page white-label PDF report editor (editable blocks, logo and GBP mockup uploads, keyword-ranking tables, auto-generated map locations) with one-click client report downloads.

MJ Plumber & Heating — London Plumbing Lead-Generation Website *Brandix Soft, Sep 2026 – Present*
Stack: Next.js 16, React, Tailwind CSS, Google Maps, libphonenumber, Apache + Phusion Passenger, Bunny CDN

- Designed and built a responsive multi-page site to improve local search visibility and convert visitors into calls and quote requests: 5 core service pages (emergency plumbing, leak repairs, boiler repairs, central heating, drain unblocking).
- Added Book a Callout forms, click-to-call 24/7 emergency line, Google Reviews, FAQs, accreditations, before-and-after project slider, service-area section, and embedded Google Maps.
- Integrated an AI chat widget and HighLevel CRM for automated lead capture and follow-up.

Kainat Travels — Enterprise Transport & Fleet Management Platform *SAR ZONE, 2022 – 2023*
Stack: Laravel, Vue.js, MySQL, REST APIs

- Architected a centralised transport-management system for enterprise bus operations, fleet tracking, and financial monitoring.
- Built route and schedule management (trip planning, bus routing, departure control), booking and ticketing with seat allocation and live inventory, HR and staff operations, and accounting dashboards with real-time revenue and expense reports.

SNAPPL — Enterprise Real Estate ERP & Financial Automation System *SAR ZONE, 2022 – 2023*
Stack: Laravel, Vue.js, MySQL

- Architected an ERP covering property sales, customer and unit management, agent commissions, and financial operations.
- Built instalment and down-payment workflows, recovery tracking, ledgers, aging balances, and transaction histories; implemented hierarchy-based commission payouts and dashboards for sales, revenue, and outstanding recoveries.

YourMart — B2B Dropshipping & Automated E-commerce Management Platform *SAR ZONE, 2022 – 2023*
Stack: Laravel, MySQL, Redis

- Built the backend of a B2B dropshipping marketplace covering seller operations, procurement, and multi-supplier fulfilment, with wallet, ledger, and settlement workflows for multi-seller payouts.
- Implemented the full order lifecycle (booking, dispatch, transit tracking, delivery sync), automated inventory and supplier mapping, role-based dashboards for sellers and admins, and database optimisations for financial and cross-platform inventory reporting.

ADDITIONAL PROJECTS — BRANDIX SOFT

Brandix Stack — Internal CRM + ERP Platform *Private, internal use*
Stack: Laravel, Vite, Blade, jQuery, Bootstrap, Docker

- Built a full CRM + ERP with 3 role-based panels (admin/superadmin, client, employee) that replaced Teamwork for the company. Sales leads convert to sales, then to projects distributed across departments.
- Clients onboard and track project progress; teams use live chat, group and internal chat, tasks, and comment threads for client–admin–employee project discussion. Docker-based deployment.

Brandix Stack HRM — Internal Human Resource Management Tool *Private, internal use*
Stack: Laravel, Vite, React, Bootstrap, jQuery, MongoDB

- Digitised the company's Excel-based HR records into one system covering salaries, leaves, holidays, tax, and other employee records.

123 Oil — Oil Supply Quotation System with Admin Panel *Client project*
Stack: WordPress, Laravel, Blade, Bootstrap, jQuery

- Built a quotation system where admins control the form fields, oil-supply listings, and pricing from the admin panel; customer quotations are generated from the submitted forms. Front end partly on WordPress.

Van Man Rentals — Moving Services Website with Quotation Management *Client project*
Stack: WordPress custom plugin, Laravel, core PHP, MySQL

- Built a custom quotation-form plugin for the public site and a backend panel (custom PHP/Laravel, MySQL) to handle quotations and booking operations.

Smilesizter — Clothing Marketplace: Web and Mobile App Backend *Client project*
Stack: Laravel REST APIs, WordPress front end, iOS and Android apps

- Built the Laravel REST APIs and backend powering the brand's iOS and Android apps (buy, sell, and exchange items); web front end on WordPress.

Motoebikes — Dropshipping E-bike Store with Multi-Vendor API Sync *Client project*
Stack: WordPress front end, Laravel API

- Built a Laravel API that syncs products from multiple vendors and regularly updates stock, and places and books orders with vendors via API; storefront on WordPress.

Super Pet Travel — Pet Relocation Website: PHP to WordPress Migration *Client project*
Stack: PHP, JavaScript, CSS, HTML → WordPress GitHub

- Took over the custom PHP codebase and migrated the site to WordPress at the client's request.

Restiq Beds — Custom Shopify Theme *Client project*
Stack: Shopify, Liquid GitHub

- Built a fully custom Shopify theme in Liquid: home page with catalogues, product detail pages, and cart/add-to-cart flow.

Eastern Kentucky University — Custom WordPress Theme *Client project*
Stack: WordPress, PHP, custom theme

- Built a custom WordPress theme on demand for the university website.

WJB Groundworks — Website UI Upgrade *Client project*
Stack: Core PHP, MySQL, HTML, jQuery, Bootstrap, Nginx

- Upgraded and modernised the UI of an existing core PHP site with a Bootstrap-based theme, served on Nginx.

VCR Electric Services — Website UI Improvement *Client project*
Stack: Core PHP, MySQL, HTML, Bootstrap, jQuery

- Improved the UI of the core PHP site and worked alongside the SEO team that handled its search optimisation.

MB Joinery Design — Wix Site Improvements *Client project*
Stack: Wix

- Customised the Wix design and delivered a working quotation form.

The Rapid Rescue — Single-Page SEO Website *Client project*
Stack: WordPress

- Recommended and built a single-page, SEO-optimised WordPress site for the client.

Earlier projects (AdRightly, 2021–2022)

- **Inverst Spain** (Jun–Aug 2022): Backend and localisation engine for a multilingual real-estate platform (English, Spanish, German, Russian); location, price, and feature filtering APIs, video and virtual-tour support; deployed on Nginx/Linux.
- **Rs Taxi** (Apr–Aug 2022): Backend and booking workflows for a Germany-based 24/7 taxi platform: multi-step bookings, fixed-price airport transfers, minimum-time rules, and concurrent-booking handling across group taxi, patient transport, and school rides.
- **Move2Marbella** (Nov 2021–Apr 2022): Backend for a luxury real-estate platform with multi-criteria search, lead-capture APIs, CRM integration, database indexing, and multilingual content.

EDUCATION

Bachelor of Science in Computer Science (BSCS) *2017 – 2021*
University of Agriculture, Faisalabad (UAF) GPA: 3.32 — Dean's List

FSc Pre-Engineering (Physics, Chemistry, Mathematics) *2014 – 2017*
Superior College, Faisalabad
